## About Centre for Law, Technology and Innovation (CLTI)

Centre for Law, Technology and Innovation (CLTI), school of law, is dedicated to bridging the gap between law, technology, and policy in an era of rapid digital transformation.

Covering domains such as artificial intelligence, blockchain, cybersecurity, fintech, and data privacy, CLTI equips students with the expertise to address the legal, ethical, and regulatory challenges shaping the digital economy.

Through research, experiential learning, and interdisciplinary collaborations, we empower future leaders to navigate and influence the evolving landscape of law and technology.

**LexHack 1.0 isn't just any hackathon, it's the ultimate legal-tech overnight event where sharp minds from law and tech collide to cook up AI-powered solutions that could shake up the legal world!**

Think of it as a courtroom drama meets Silicon Valley where you don't just argue cases, you build the future of legal innovation.

In this first-of-its-kind extravaganza, you'll ideate, create, debate, and dominate in a three-stage competition.

So grab your gavels, gear up your GitHubs, and let's hack the system — literally.

## EVENT STAGES

### INNOVATE

Build your software  
overnight

### ADVOCATE

Defend your code

### DOMINATE

Pitch to the sharks

## INNOVATE –Build your software

The event will begin by teams developing an AI-powered solution addressing a critical legal challenge. Participants can choose from various problem statements that require integrating artificial intelligence into legal frameworks. Some suggested themes include:

- ★ **AI for Legal Drafting** – a model that assists in legal drafting of contracts, pleadings, lists of dates, annexures, and legal provisions, etc.
- ★ **AI Agent for Motor Vehicle Rules** –an AI tool that provides real-time information on traffic laws, penalties, vehicle registration, and compliance with the Motor Vehicles Act.
- ★ **Virtual Legal Consultant** – an AI-powered chatbot offering basic legal consultancy, answering common legal queries, and guiding users toward appropriate legal remedies.
- ★ **AI-Based Legal Data Extraction** –an AI system capable of extracting metadata and key legal information from case files, including party names, case citations, relevant laws, statutory provisions, and petition formats (e.g., Special Leave Petition – Form 28, Supreme Court Rules, 2013).

## **ADVOCATE – Defend Your product**

Once the AI model is developed, law students will step into the role of advocates and defend their AI solution from a legal perspective.

Key legal domains to be considered:

- ★ Intellectual Property Rights (IPR) – Does the AI tool infringe on any patents, copyrights, or trademarks? Who owns AI-generated legal documents?
- ★ Constitutional Validity – Is the AI system compliant with constitutional principles such as the right to privacy and due process?
- ★ IT Act & Data Privacy Laws – Does the AI comply with the Information Technology Act, 2000, and data protection regulations regarding user confidentiality?
- ★ Contract Law – If the AI generates legal agreements, how does it ensure validity, enforceability, and liability in contractual dealings?
- ★ Licensing & Regulatory Compliance – What legal permissions and licenses are required for deploying such AI-based legal solutions?

## **DOMINATE – Pitch to the Sharks**

The final stage mimics a Shark Tank-style investment round, where teams must market their AI solution to a panel of industry experts, investors, and legal professionals.

## Why Participate in LexHack?

- ★ Get **snacks** and **coffees** to keep you going overnight!
- ★ Engage with brilliant minds from top colleges and build a power-packed network that lasts beyond the hackathon.
- ★ Get mentored by industry leaders in AI, law, and business.
- ★ Enroll at just ₹250 and get a chance to win big cash prizes, certificates and goodies.
- ★ Gain hands-on experience in AI, legal research, and entrepreneurship.

**Are you ready to hack the future of law?  
Register for LexHack now!**

## **Struggling to put together the dream team? Relax, we've got you!**

Simply register on Unstop via <https://linktr.ee/clti> and build your squad with like-minded innovators. But hey, if you're still on the fence, don't sweat it—we've got a power list of top-tier participants ready to team up.

Just let us know, and we'll hook you up with a rockstar partner who's just as ready to shake up the legal-tech world as you are!
